

ESG due diligence of an agri-tech company that offers solutions for the agriculture ecosystem

Objective

To conduct an ESG due diligence for a growth investor, of an agri-tech company that offered solutions for the entire agri ecosystem (farmers, agri input suppliers and farm output buyers)

Our Work

Envint's ESG due diligence support included:

- Incorporation of Investor ESG policy, IFC PS and sector-specific guidelines in ESDD report
- Information & documentation review around E&S risks, including site visits
- Stakeholder interactions, including farmers, employees, channel partners & management
- Preparation of ESDD report, identifying key ESG risks & opportunities, gaps against reference frameworks & an ESG action plan (ESAP).

Impact

The Client has been able to identify the key ESG risks and prioritize them with an ESG correction action plan with timelines. The ESG DD assessment also helped the Client with inputs on post transaction monitoring of the target.
